

TBB Triple Beam Balances

Patent #D528,935

Adam's patented TBB is today's best value in mechanical balances from a brand scientists worldwide have trusted for over thirty-five years. The TBB offers the functions and durability needed for your applications.

- Everything you need for density calculations - tripod legs and weigh-below hook included.
- Designed to withstand daily use, with rugged construction and a security slot to prevent theft.
- Outstanding engineering for reliable readings year after year.

ADAM
THE RIGHT BALANCE
Speed, Performance, Value

Built tough With a larger overall body than other triple beam balances, the TBB is the sturdiest choice. Quality construction with strong metal housing and a stainless steel pan.

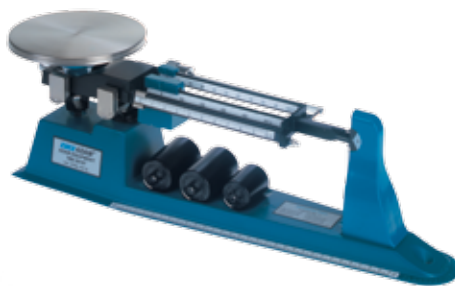

Ready for theft protection A factory-installed security slot is built right into the housing. Compatible with a Kensington™ – type security lock/cable (sold separately.)

Better below-balance weighing Innovative tripod legs and integral weigh-below hook allow you to do density activities wherever you want without the inconvenience of having to clamp onto a table and create your own make-shift hook.

Reliable readings Three graduated-tier beams for the best possible center-point readings. Speedy zeroing with counterbalance knob.

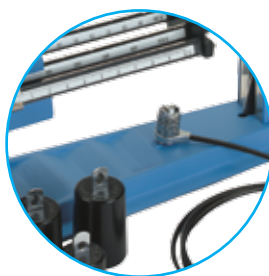

Added value With a conversion chart, ruler, and protractor right on the housing, the TBB is a complete measurement tool.

The only triple beam designed for today applications

Standard Features

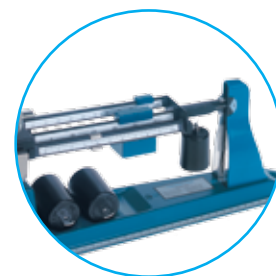

- Factory-installed security slot
- Larger, sturdier body
- Stainless steel pan
- Protractor, ruler and conversion chart
- Built-in mass holder
- Magnetic dampening
- Positive poise positioning

Security slot for lock and cable.

Tripod legs and integral weigh-below hook make density experiments convenient and easy.

Mass holders offer handy storage for additional weights.

Technical Specifications

Model	TBB2610S	TBB2610T
Capacity	2610g	2610g
Readability	0.1g	0.1g
Unit of Measure	Grams	
Tare Capacity	n/a	225g
Calibration	10g x 0.1g	
Front Beam	500g x 100g	
Middle Beam	100g x 10g	
Rear Beam		
Display	Graduated Beam	
Stainless Steel Pan	150mm ø / 6 ø	
Density Tripod Legs	■	■
Security Slot	■	■
Warranty	5 years	5 years

Accessories

- Item: 8030 - Kensington™ type lock and cable
- Item: 9024 - Hard carry case
